

March 20, 2020

Good evening Noah Webster families,

Today, March 20, 2020, Governor Doug Ducey and Kathy Hoffman, Superintendent of Public Education, have mandated that the school closures in Arizona be extended and all schools will remain closed through April 10. We have been instructed to make every effort to provide continued educational learning opportunities through online resources or materials that can be sent home.

At Noah Webster Schools, we will continue to provide our students with educational opportunities through learning materials and activities during this time of school closure. Classroom and Special Education teachers will send out curriculum information regularly to their families to ensure these opportunities continue to be available to all students. These emails will provide our families with at home learning options, so all students can continue learning while away from school.

Thank you for your continued patience during this time.

Sincerely,

Noah Webster Schools
