

Dear Families,

We are looking forward to a great year at Noah Webster. We are excited about our reading and math comprehensive curriculum programming. At Noah Webster we use the Wonders reading curriculum and the Reveal math curriculum which are both published by McGraw Hill. This allows students to access their student materials, activities, and workspace through one site. This site can be accessed at home as well through Microsoft Office 365.

1) Log in to Microsoft Office 365 at:

<https://www.office.com/>

2) Student will log in with their Noah Webster student log-in credentials (Your child's teacher can provide this information if needed).

3) Once you are logged into Microsoft Office 365, choose the Apps Launcher icon at the top left.

4) Choose the McGraw Hill icon.

5) If the McGraw Hill icon is not visible, please choose the All Apps icon at the bottom of the Apps Launcher screen.

All apps →

6) From here, choose the McGraw Hill icon.

7) Once the McGraw Hill site opens, you are able to choose the Wonders reading program or the Reveal math program.

Thank you for partnering with Noah Webster and supporting your child's education.
